

It's extraordinary times

COVID-19 LOCKDOWN SPECIAL

I'm Michael Sorensen, an architect who has lived and worked in Margaret River for the last 25 years. I specialise in sustainable architecture and have been involved with the eco village for some years now. We, which is me, my artists & horticulturalist wife Britta and our springer spaniel Flot, are planning to move into the eco village as soon as possible.

We are currently using our forced downtime to design & model our own house and thought you might like to do the same, with the help of an experienced architect at an exceptionally cheap rate, equivalent to a draftsperson and at more than half the normal hourly fee.

I offer consultation, concept design, sketching up of ideas, basic 3D modelling, documentation - any or all of those aspects on an hourly rate of \$70 + GST on a casual basis for as long as this crisis lasts.

Ring me for a free and casual chat and let's see if we can take it from there. It is a fantastic opportunity to use current surplus time and get your head into a positive future planning space. We would like to get to know our future neighbours anyway.
