

Low Emission - High Efficiency - Stylish - Quality - Robust - Intelligent

PIAZZETTA

PELLET FIREPLACES

Piazzetta has been manufacturing fine heating appliances since 1960. Featuring efficient high heat output with modern stylish Italian design & manufacturing excellence. Piazzetta Heaters are fully programmable, clean, safe & above all are an ecologically sound heating solution. The heaters comply with the stringent European EcoDesign & Energy Rating System. All heaters in the 2022 range are hermetically sealed and offer the highest efficiency on the market & robust construction.

TECHNOLOGY & FEATURES:

Exclusive Multifuoco: System & Trend heaters provide warmth from a vent low on the heater, providing uniform heating from floor to ceiling.

Night/Natural Mode: Operate the heater in natural convection mode in Power Level P1 or P2 for more gradual heating and super quiet operation.

Wifi - Bluetooth: Control your heater from your phone wherever you are.

Programmable: Set automatic turn-on and turn-off programs for every day of the week.

Hermetically Sealed: Airtight design for passive houses. Combustion air sourced from outside.

Easy Remote: Control the fan, room temperature and power level quickly and simply.

Simplicity of Pellets: Easy, practical and eco-friendly - a thoroughly modern & effective heating solution. The fuel level indicator notifies when pellets are running low.

Humidifier: Boost natural humidity or create ambience with essential oils.

Pellets: Red Hot Wood Pellets are available through Piazzetta Australia.

DECISION CONSIDERATIONS

Piazzetta Pellet Heaters are highly efficient so deciding on the right heater is critical. That's why we calculate the heating area in cubic metres. Understanding the natural efficiency of your home will also play a role. Hermetically sealed, passive solar & energy efficient homes will have lower heat requirements than older homes. The use of ceiling fans will assist in moving heat to other spaces. The Multifuoco system will improve efficiency in larger spaces.

CAROL

CLEOPE

TECHNICAL DATA

Firebox heat output kW	6.5
Nominal heat output (min-max) kW	2.5 – 6.0
Room heating capacity (min-max) m ³	100 – 175
Nominal thermal efficiency %	92.1%
Nominal consumption (min – max)	0.6 – 1.3
Electric power consumption (W)	90 – 370
Standard flue outlet ø cm	8
Hopper Capacity kg	10.5
Dimensions W x D x H cm	45.5 x 43 x 96
Stove weight kg	90
Heating	Forced Air Ventilation
